

BED DOCKER

The SMP Bed Docker is uniquely designed to prevent damage to hospital beds and walls. This unit features customized laminated aluminum service cover plates allowing it to blend right in with any room aesthetics.

Over 2000 custom laminate colors available to choose from.

FEATURES AND BENEFITS

One piece seamless design

Durable and easy to clean

Inner unit construction: 16 ga. galvanized steel and standard 1/2" or 3/4" ridged conduit wire

Outer shell construction: molded from 1/8" fire rated PVC or ABS

Can be fully integrated with any headwall system

Customized laminated aluminum service cover plates

Allows for a maximum of 10 North American standard receptacles or 8 European standard receptacles

BED LOCATOR

The SMP Bed Locator offers an all new one piece KYDEX design allowing it to be a superior product when it comes to infection control. This bed locator is constructed with a 16 gauge steel for high impact and all pre-installed devices are pre-wired to service termination locations.

FEATURES AND BENEFITS

- One piece KYDEX cover facilitates cleaning
- Protects wall, positions bed and provides bedside services
- Metal distribution raceways
- Can be fully integrated with any headwall system
- Provides up to 8 electrical services and/or low voltage services

BED BUMPER

The SMP Bed Bumper is an economical way to provide protection for both the bed and the wall while properly positioning the bed.
